April 15th Aries New Moon: Our first new moon of the astrological year. Write out intentions for this seeding time that feel freshly alive. A new, first chapter for our new astrological year to be built upon. Connect to what's passionate and fresh, cracking open inside of you.

April 26th Scorpio Full Moon: This is the full moon after the April 15th Aries new moon. Review your Aries new moon intentions from the previous journal entry. This moon can give you clues as to which of your Aries seeds are potent. Write about what's feeling emotionally clear inside of you regarding Aries themes in your life—around any beginnings that were felt during mid-April, as well as what seems to be coming to fruition, or fullness, around Scorpio themes of intimacy, sex, shared resources, uprooting blocks, or empowerment.
